

**SYSTEM, MOBILE STATION, METHOD AND COMPUTER
PROGRAM PRODUCT FOR MANAGING CONTEXT-RELATED
INFORMATION**

ABSTRACT OF THE DISCLOSURE

A mobile station for managing context-related information includes at least one sensor capable of measuring at least a portion of at least one condition of the mobile station. The mobile station also includes a context engine capable of storing context-related information based upon the portion of the condition(s), where the context engine is also capable of managing an exchange of the context-related information with at least one context consumer. The mobile station further includes a privacy engine, a script engine and a communication manager. The privacy engine can provide security and/or privacy to the exchange of the context-related information. The script engine can execute at least one context rule relating to at least a portion of the context-related information. And the communication manager can communicate with at least one context consumer external to the mobile station for the exchange of context-related information.
